

Organization Evolves and Migrates OpenText to the Cloud

Organizations have been benefiting from the functionality of the leading Enterprise Content Management (ECM) solution for SAP, OpenText, for many years. To align with long-term strategies, deliver critical new functionality and streamline business processes, it has become imperative for many to move their existing OpenText infrastructure to cloud.

Auritas has assisted many organizations across industries with their cloud migration exercises ranging from 2 to 45 terabytes of data from outdated storage centers to a modern cloud environment. Auritas provides expert SAP and OpenText professional consulting services to stabilize, move and consolidate data from existing OpenText systems and disparate storage centers and successfully accomplish digital transformation objectives.

THE BUSINESS PROBLEM

The organization's financial division has benefited from the capabilities of the leading Enterprise Information Management (EIM) solution, OpenText, for many years. As part of the long-term strategy to improve its business systems, it successfully migrated its business system to the cloud – improving access and storage as well as reducing support cost.

This effort, conducted in July of 2020, was the first and largest engagement of its kind for the organization – migrating over 30 terabytes of data from outdated storage centers to a modern cloud environment. In addition to migrating and consolidating data from disparate storage centers, this digital transformation effort included tasks to upgrade, stabilize, and move its system on-premise OpenText Document Access to cloud services.

AURITAS SOLUTION

Auritas worked with the company's team, OpenText Public Sector Solutions (OTPSS) and other key technology partners to provide expert SAP and OpenText implementation and support services.

- ✿ Stabilization of the business system on-premise OpenText landscape prior to cloud migration.
- ✿ Set up, configuration, and maintenance of six OpenText environments in the system's cloud.
- ✿ Migration of on-premise content to the system's cloud.

SOLUTION SCOPE

- ✿ "Design and Blueprint" workshops with the Army team to create a roadmap for success.
- ✿ Creation of 6 OpenText Archive environments in the Amazon Web Services (AWS) Cloud.
- ✿ Connection of 8 SAP systems to 6 OpenText Archive environments.
- ✿ Migration of 8 terabytes of data from on premise architecture to cloud.
- ✿ Post go-live Hypercare ensured systems were operational, monitoring was implemented and fine-tuned.
- ✿ Successful testing of all functionality including Disaster Recovery.
- ✿ SAP archiving performed prior to migration to ensure that the SAP HANA DB was as lean as possible to support cost-effectiveness, faster system restarts and optimal system performance
- ✿ The process was developed and work started on other archiving opportunities to extend ROI and results.

RESULTS AND BENEFITS

- ☒ Successful OpenText migration to the AWS Cloud; On budget and ahead of schedule with no user impact or issues.
- ☒ Savings upwards of \$10M due to no more mandatory technology refreshes every 5 years.
- ☒ OpenText data and systems are now in the cloud, readily available to all users and supported by Amazon Web Services.
- ☒ More visible, accessible, understandable, trusted, interoperable and secure.
- ☒ improved user experience, reliability, and disaster recovery.

“ The completion of this monumental effort underscores our ability to press forward with strategic partners to provide modern solutions that benefit our workforce, and the organization as a whole. ”

ABOUT AURITAS

Auritas is a global ERP products and services company specialized in data management, process optimization, and product innovation, with a focus on SAP Enterprise customers. Since its inception in 2003, Auritas has been closely aligned with SAP & has established itself as a leading pioneer in the market for all things data & process.
